

The Strategy for Fame

Are our imaginations
filled fullest to the brim?
And are we emotionally attached
to our dream?
Let us not build castles
in the empty and expect
Miracles to happen;
we are then inexact!
For results come with thoughtful aim,
effective plan and devoted hard work!

To attain an elevated systematic mark,
we need rapt attention
Imagination has to be blended
with adequate comprehension;
We should dream with passion
and pursue systematic experimentation.
We should be determined
to embrace success with compassion.
Conscientiously carried out work
cannot bring results of apprehension.

For every success there is an objective
and a meticulous plan
And a systematic effort, to follow the strategy:
we may then belong to a successful clan!
Nevertheless, we get nervous and easily frustrated
and forget to trust the team,
Often complacent and naïve,
we get in to incompetence and start the blaming game!
Man! Move with strategy and honest efforts:
success is waiting to come with glory and fame!
